7A-7B
--Figure 7 (SEQ ID NO: 17) shows the sequence of the Ltp promoter region from a cotton fiber specific lipid transfer protein gene (SEQ ID NO: 16) and the cotton fiber specific lipid transfer protein (SEQ ID NO: 18) encoded by the gene.

Ms. D2
Figure 8 shows the arrangement of binary vectors, pCGN5148 and pCGN5616 for plant transformation to express genes for melanin synthesis and indigo synthesis, respectively.

Figure 9 provides the results of color measurements taken from fibers of the control Coker 130 cotton used in transformation using color constructs.

Figure 10 shows the results of measurements made of color of plants transformed by the pCGN5148 construct to express genes for melanin synthesis.

131
Figure 11 shows the results of measurements taken of the color of plants transformed by the pCGN5149 construct to express genes for melanin synthesis.

Figure 12 shows the results of measurements made of color of plants transformed to express genes for indigo synthesis using construct pCGN5616.

Figure 13 shows control measurements made of naturally colored cotton plants which are produced by non-transgenic colored cotton plants.--.
